1. Nature of Operations

Avino Silver & Gold Mines Ltd. (the "Company" or "Avino") was incorporated in 1968 under the laws of the Province of British Columbia, Canada. The Company is engaged in the production and sale of silver, gold, and copper and the acquisition, exploration, and advancement of mineral properties.

2. Basis of Presentation

Statement of Compliance

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IAS 34 – Interim Financial Reporting under IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB"). These unaudited condensed consolidated interim financial statements do not contain all of the information required for full annual consolidated financial statements. Accordingly, these unaudited condensed consolidated interim financial statements should be read in conjunction with the Company's December 31, 2025 annual consolidated financial statements, which were prepared in accordance with IFRS Accounting Standards as issued by the IASB. In particular, the Company's material accounting policy information was presented in Note 3 of the annual audited consolidated financial statements for the year ended December 31, 2025, and have been consistently applied in the preparation of these condensed consolidated interim financial statements, except as follows:

Plant, equipment and mining properties

Effective April 16, 2026, and the date of the Company's NI 43-101 Technical Report, the Company commenced depleting mining properties using the units of production method based on the estimated remaining life of the mine, for its mining operations that have achieved management's intended production levels. The change in accounting policy did not have a significant impact on depreciation in the current period nor will it have a significant impact in subsequent periods.

Basis of Presentation

These consolidated financial statements are expressed in US dollars and have been prepared on a historical cost basis except for certain financial instruments that have been measured at fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting on a going concern basis. The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements as if the policies have always been in effect.

Foreign Currency Translation

Foreign Currency Transactions

Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on the dates of the transactions. At each financial position reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date of the statement of financial position. Non-monetary items that are measured in terms of historical cost in a foreign currency are not re-translated.

Foreign Operations

Subsidiaries that have functional currencies other than the US dollar translate their statement of operations items at the average rate during the year. Assets and liabilities are translated at exchange rates prevailing at the end of each reporting period. Exchange rate variations resulting from the retranslation at the closing rate of the net investment in these subsidiaries, together with differences between their statement of operations items translated at actual and average rates, are recognized in accumulated other comprehensive income (loss). On disposition or partial disposition of a foreign operation, the cumulative amount of related exchange difference is recognized in the statement of operations.

Significant Accounting Judgments and Estimates

The Company's management makes judgments in its process of applying the Company's accounting policies to the preparation of its consolidated financial statements. In addition, the preparation of financial data requires that the Company's management make assumptions and estimates of the impacts on the carrying amounts of the Company's assets and liabilities at the end of the reporting period from uncertain future events and on the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates as the estimation process is inherently uncertain. Estimates are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. Revisions to estimates and the resulting impacts on the carrying amounts of the Company's assets and liabilities are accounted for prospectively.

The critical judgments and estimates applied in the preparation of the Company's unaudited condensed consolidated interim financial statements for the nine months ended September 30, 2026, are consistent with those applied and disclosed in Note 2 to the Company's annual consolidated financial statements for the year ended December 31, 2025.

3. Recent Accounting Pronouncements

New and amended IFRS Accounting Standards that are effective for the current year:

Certain new accounting standards and interpretations have been published that are either applicable in the current year or are not mandatory for the current period and have not been early adopted.

During the nine months ended September 30, 2026, the Company adopted amendments to IFRS 9 Financial Instruments and related amendments to IAS 7 Statement and of Cash Flows and IFRS 7 Financial Instruments: Disclosures, related to the settlement of financial assets and financial liabilities through electronic payment systems. The amendments clarify the timing of recognition and derecognition of financial assets and financial liabilities settled electronically and introduce and optional exception for certain electronic payment arrangements. We have assessed these amendments and the adoption of these amendments did not have a material impact on the Company's consolidated financial statements.

IFRS Accounting Standards not yet adopted:

Certain new accounting standards and interpretations have been published that are either applicable in the current year or are not mandatory for the current period and have not been early adopted.

On April 9, 2024, the IASB issued IFRS 18 "Presentation and Disclosure in the Financial Statements" ("IFRS 18"), replacing IAS 1 "Presentation of Financial Statements". IFRS 18 introduces new categories and defined subtotals in the statement of profit or loss, introduces the concept of management-defined performance measures ("MPMs") and related disclosure requirements, and includes requirements to improve the aggregation and disaggregation of information in the financial statements. With respect to the statement of profit or loss, items of income and expenses will be grouped into new categories and defined subtotals, resulting in changes to certain existing line items and the subtotals presented, with no change to net income. An MPM is defined as a subtotal of income and expenses that a company uses in public communications outside of its financial statements to represent management's view of the company's financial performance.

As a result of IFRS 18, amendments to IAS 7 "Statement of Cash Flows" were also issued to require that entities use the operating profit subtotal as the starting point for the indirect method of reporting cash flows from operating activities. In addition, presentation alternatives will be removed for interest paid and received. All interest paid will be required to be presented as a financing cash flow, representing a change from the Company's current presentation of capitalized interest paid within cash flows used in investing activities.

The Company is currently assessing the impact of IFRS 18 on its financial statements and will apply the standard from its mandatory effective date of January 1, 2027. As retrospective application is required, the comparative information for the financial year ending December 31, 2026, including each quarter therein, will be restated in accordance with IFRS 18.

A. Avino, Mexico

The Company's subsidiary Avino Mexico owns 42 mineral claims and leases four mineral claims in the state of Durango, Mexico. The Company's mineral claims in Mexico are divided into the following two groups:

1. Avino Mine Area Property

The Avino Mine area property is situated around the towns of Panuco de Coronado and San Jose de Avino and surrounding the historic Avino mine site. There are four exploration concessions covering 154.4 hectares, 24 exploitation concessions covering 1,284.7 hectares, and one leased exploitation concession covering 98.83 hectares.

2. Unification La Platosa Properties

The Unification La Platosa properties, consist of three leased concessions in addition to the leased concessions situated within the Avino mine area property near the towns of Panuco de Coronado and San Jose de Avino and surrounding the Avino Mine.

In February 2012, the Company's wholly-owned Mexican subsidiary entered into a new agreement with Minerales de Avino, S.A. de C.V. ("Minerales") whereby Minerales has indirectly granted to the Company the exclusive right to explore and mine the La Platosa property known as the "ET zone". The ET zone includes the Avino Mine, where production at levels intended by management was achieved on July 1, 2015.

Under the agreement, the Company has obtained the exclusive right to explore and mine the property for an initial period of 15 years, with the option to extend the agreement for another 5 years. In consideration of the granting of these rights, the Company issued 135,189 common shares with a fair value of C$250 during the year ended December 31, 2012. The Company has agreed to pay to Minerales a royalty equal to 3.5% of net smelter returns ("NSR"). In addition, after the start of production, if the minimum monthly processing rate of the mine facilities is less than 15,000 tonnes, then the Company must pay to Minerales a minimum royalty equal to the applicable NSR royalty based on the processing at a monthly rate of 15,000 tonnes.

Minerales has also granted to the Company the exclusive right to purchase a 100% interest in the property at any time during the term of the agreement (or any renewal thereof), upon payment of $8 million within 15 days of the Company's notice of election to acquire the property. The purchase would be subject to a separate purchase agreement for the legal transfer of the property.

B. La Preciosa, Mexico

La Preciosa is a development stage mineral property located in the state of Durango, Mexico, within the municipalities of Pánuco de Coronado and Canatlán. The Project is hosting one of the largest undeveloped primary silver resources in Mexico, and is located adjacent to Avino's existing operations at the Avino Property in Durango, Mexico. The property covers an area of approximately 1,134 hectares and is located on the eastern flank of the Sierra Madre Occidental mountain range.

On April 1, 2025, the Company determined that La Preciosa had demonstrated technical feasibility and commercial viability to support the reclassification from the exploration and evaluation asset stage to the development stage and mining properties with plant, equipment and mining properties.

As such, the Company performed an assessment for impairment under IFRS 6 prior to reclassification. Management assessed whether or not the assets were impaired using a quantitative assessment of the recoverable value.

Based on these factors, all of the criteria required by IAS 36.10 have been met, and the Company determined that the recoverable amount exceeds the carrying value, and no impairment was recorded.

8. Non-Controlling Interest

At September 30, 2026, the Company had an effective 99.67% (December 31, 2025 - 99.67%) interest in its subsidiary Avino Mexico and the remaining 0.33% (December 31, 2025 - 0.33%) interest represents a non-controlling interest. The accumulated deficit and current period income attributable to the non-controlling interest are insignificant and accordingly have not been presented separately in the consolidated financial statements.

D. Restricted Share Units

On April 19, 2018, the Company's Restricted Share Unit ("RSU") Plan was approved by its shareholders. The RSU Plan is administered by the Compensation Committee under the supervision of the Board of Directors as compensation to officers, directors, consultants, and employees. The Compensation Committee determines the terms and conditions upon which a grant is made, including any performance criteria or vesting period.

Upon vesting, each RSU entitles the participant to receive one common share, provided that the participant is continuously employed with or providing services to the Company. RSUs track the value of the underlying common shares, but do not entitle the recipient to the underlying common shares until such RSUs vest, nor do they entitle a holder to exercise voting rights or any other rights attached to ownership or control of the common shares, until the RSU vests and the RSU participant receives common shares.

17. Financial Instruments

The fair values of the Company's amounts receivable not subject to provisional pricing, due to/from related parties and accounts payable approximate their carrying values because of the short-term nature of these instruments. Cash, amounts receivable subject to provisional pricing, long-term investments are recorded at fair value. The carrying amounts of the Company's deferred consideration payable, equipment loans, and finance lease obligations are a reasonable approximation of their fair values based on current market rates for similar financial instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, and market risk.

A. Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company has exposure to credit risk through its cash, long-term investments and amounts receivable. The Company manages credit risk, in respect of cash and short-term investments, by maintaining the majority of cash and short-term investments at highly rated financial institutions.

The Company is exposed to a significant concentration of credit risk with respect to its trade accounts receivable balance because all of its concentrate sales are with two (December 31, 2025 – two) counterparties (see Note 18). However, the Company has not recorded any allowance against its trade receivables because to-date all balances owed have been settled in full when due (typically within 60 days of submission) and because of the nature of the counterparties.

The Company's maximum exposure to credit risk at the end of any period is equal to the carrying amount of these financial assets as recorded in the consolidated statement of financial position. At September 30, 2026, no amounts were held as collateral.

B. Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows required by its operating, investing and financing activities. The Company had cash at September 30, 2026, in the amount of $138,247 and current assets exceeded current liabilities by $141,529 in order to meet short-term business requirements. Accounts payable have contractual maturities of approximately 30 to 90 days, or are due on demand and are subject to normal trade terms. The current portions of finance lease obligations are due within 12 months of the consolidated statement of financial position date. Amounts due to related parties are without stated terms of interest or repayment.

The maturity profiles of the Company's contractual obligations and commitments as at September 30, 2026, are summarized as follows:

	Total	Less Than 1 Year	1-5 years	More Than 5 Years
Accounts payable and accrued liabilities	$ 11,086	$ 11,086	$ -	$ -
Derivative liability	523	523	-	-

Finance lease obligations	6,295	3,155	3,140	-
Total	**$ 19,624**	**$ 15,592**	**$ 4,032**	**$ -**

C. Market Risk

Market risk consists of interest rate risk, foreign currency risk and price risk. These are discussed further below.

Interest Rate Risk

Interest rate risk consists of two components:

i. To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.

ii. To the extent that changes in prevailing market rates differ from the interest rates on the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

In management's opinion, the Company is not materially exposed to interest rate risk, as any material debt obligations that bear interest are fixed and not subject to floating interest rates. A 10% change in the interest rate would not result in a material impact on the Company's operations.

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign currency risk to the extent that the following monetary assets and liabilities are denominated in Mexican pesos and Canadian dollars:

	September 30, 2026		December 31, 2025	
	MXN	CDN	MXN	CDN
Cash	$ 18,714	$ 2,158	$ 29,172	$ 1,710

Based on the net US dollar denominated asset and liability exposures as at September 30, 2026, a 10% fluctuation in the US/Mexican and Canadian/US exchange rates would impact the Company's earnings for the nine months ended September 30, 2026, by approximately $129 (December 31, 2025 – $248). The Company has entered into certain foreign currency contracts to mitigate this risk and at September 30, 2026, recorded a derivative liability of $523 (December 31, 2025 – derivative asset of $1,314).

Price Risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk.

The Company is exposed to price risk with respect to its amounts receivable, as certain trade accounts receivable are recorded based on provisional terms that are subsequently adjusted according to quoted metal prices at the date of final settlement. Quoted metal prices are affected by numerous factors beyond the Company's control and are subject to volatility, and the Company does not employ hedging strategies to limit its exposure to price risk. At September 30, 2026, based on outstanding accounts receivable that were subject to pricing adjustments, a 10% change in metals prices would have an impact on net earnings (loss) of approximately $145 (December 31, 2025 - $743).

The Company is exposed to price risk with respect to its long-term investments, as these investments are carried at fair value based on quoted market prices. Changes in market prices result in gains or losses being recognized in net income (loss). At September 30, 2026, a 10% change in market prices would have an impact on net earnings (loss) of approximately $272 (December 31, 2025 - $384).

The Company's profitability and ability to raise capital to fund exploration, evaluation and production activities is subject to risks associated with fluctuations in mineral prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

D. Classification of Financial Instruments

IFRS 13 Financial Instruments: Disclosures establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table sets forth the Company's financial assets measured at fair value on a recurring basis by level within the fair value hierarchy as at September 30, 2026:

18. Segmented Information

The Company reviews its segment reporting to ensure it reflects the operational structure of the Company and enables the Company's Chief Operating Decision Maker (the Company's CEO) to review operating segment performance at the mine operating income or loss level, as well as on the basis of total comprehensive income. Effective December 31, 2025, it was determined that the Company has two reportable operating segments, located in Mexico (Avino and La Preciosa). The Company also has a Corporate segment located in Canada. Revenues, cost of sales, operating expenses, other items and income taxes are attributed to the operation in which they arise. Segment results are presented net of intersegment transactions where services are performed on behalf of other segments within the Company. There are no amounts unallocated to reportable segments. Previously, the Company only had one reportable segment. Following this change in the composition of reportable segments, the Company has restated the corresponding segment information for the three and nine months ended September 30, 2025.
